Letter of Thanks

Dear Colasoft Oversea Team,

On behalf of MOBIS Parts Europe N.V. I would like to convey our sincere thanks to Colasoft for your concern on our Network Performance Monitoring and Diagnostics work.

Colasoft nChronos network performance analysis system performed very well in capturing and analyzing network traffic, on a heavy link with 0 packet loss. It can help us much on network troubleshooting, and provide various reports to let us easily know what happened in the network. In addition, accumulating know-how by producing reports describing the causes of faults is another important part of our job. The way that the nChronos makes this much easier is a big benefit for us.

Your efficient and rapid response on the technical support and after-sales service is also worthy of praise.

Thanks again for your assistance for our network maintenance jobs with the high-quality products and services.

Yours sincerely,

Martin Vasiley
PAN-EU IT Infrastructure Team
